

Gardens Can Transform our City!

Providing information and materials such as seeds, plants, and tools can help communities utilize urban greening and gardening to beautify and improve their neighborhoods.

Community Gardens can:

- Increase neighborhood property values
- Improve air and water quality
- Provide space for outdoor activities, education, and skill development
- Empower communities!
- Provide nutritious and delicious food
- Replace vacant land with productive, beautiful spaces

CGRN provides comprehensive support for your community green space.

- Members receive free and discounted plant and garden materials.
- CGRN currently runs five tool libraries throughout the city where members can borrow tools to use in their gardens.
- Based on availability, CGRN can pair your garden with a group of volunteers for the day.
- Workshops are hosted by CGRN and CGRN partners each month on garden-related topics.
- Members receive monthly news to keep you up-to-date on local gardening news and opportunities, as well as provide fun activities and ideas for your gardens.
- CGRN provides many ways to connect with other gardeners throughout the city.
